PROFESSIONAL SUMMARY

Detail-oriented Software Engineering student with hands-on experience in full-stack web development, networking, and cybersecurity. Skilled in building and deploying real-world applications. Passionate about developing scalable, secure, and user-focused systems.

CAREER OBJECTIVE

To secure an attachment role in software development, networking, or cybersecurity where I can apply my skills, contribute to impactful projects, and grow professionally.

EDUCATION

Bachelor of Science in Software Engineering (Ongoing)
Kirinyaga University | September 2023 – Present

PROFESSIONAL EXPERIENCE

Industrial Attachment Trainee (Software & Networking)
Fric Technologies Limited | May 2025 – August 2025 (4 months)

- Configured and maintained networking equipment (routers, switches, access points) ensuring stable connectivity
- Collaborated with the development team to write, test, and debug software components with network protocol integration
- Diagnosed and resolved network connectivity issues and software bugs, reducing system downtime
- Tested software applications under various network conditions (latency, packet loss) to improve robustness

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, PHP
Frameworks & Technologies: Next.js, Reactjs, HTML, CSS
Databases: MySQL, PostgreSQL
Tools: Linux, Docker, Git
Networking & Cybersecurity: Networking Basics, Network Configuration, Introduction to Cybersecurity

CERTIFICATIONS

- Cisco Networking Academy – Introduction to Networking
- Cisco Networking Academy – Network Configuration
- Cisco Networking Academy – Introduction to Cybersecurity

SOFT SKILLS

Problem-solving | Critical thinking | Teamwork | Communication | Adaptability

REFEREES

Available upon request.
